Install Instructions for QSX 11.9L & 15.0L Engines

- 1) Locate the ECM Harness on the driver's side of the engine.

QSX15 ECM Connector

QSX11.9 ECM Connector

2) Use a 4mm Allen Wrench to disconnect the stock ECM Engine Connector 1, as shown below.

3) Plug the female connector from the Ag Diesel Solutions harness to the male plug of the stock harness. The 4mm bolt will need to be tightened to secure the connectors.

Note: For the QSX11.9, both ECM connectors will need to be removed for proper installation of the harness to the ECM.

4) Plug the Ag Diesel Solutions male harness into the stock female connector located on the ECM Engine Connector 1. Refer to the diagram in Step 2 for correct location of ECM connector.

5) Route the power and ground wires to the starter located on the driver's side between the frame rail and engine.

6) Plug the Harness into the module. Mount the module with supplied zip ties away from any excessive heat or moving parts. **Note: Zip tie the module to the factory wire harness. Mounting the module with the connector down will help prevent moisture from collecting into the module connector.**
